5 THIS APPLICATION CLAIMS PRIORITY UNDER 35 U.S.C. § 120 OF
APPLICATION SERIAL NUMBER 09/105,406 FILED ON JUNE 26, 1998.

FIELD OF THE INVENTION

The present invention relates generally to financial transaction systems
and more particularly, to a computer server and architecture for managing
10 financial transactions involving stored value products such as smartcards.

BACKGROUND OF THE INVENTION

Financial systems using stored value products are well-known in the art.
An example of a stored value product is a pre-paid telephone card, which is
typically a plastic or paper card with a unique identification code. The code may
15 be printed on the front of the card, or it may be stored electronically on a
magnetic stripe that is attached to the card. To access the value on the card,
consumers may, for example, dial a pre-determined phone number and input the
unique code, thereby identifying the card and allowing the consumer to access a
service (such as long distance telephone service). Besides telephone services,
20 magnetic stripe cards have been used to pre-pay for, among other things,
gasoline or department store merchandise. In these industries, special card
reading machines such as those found in many retail establishments (e.g. point
